

GADGETS SALES PERFORMANCE ANALYSIS

1. INTRODUCTION

This project analysis gadgets sales data across different weeks and countries.

The objective is to evaluate product performance, customer behaviour, marketing impact, and overall sales insights. The analysis helps identify top-performing products, high-revenue regions, the effect of marketing spend, and sales trends.

2. DATASET OVERVIEW

The dataset contains 500+ rows with the following fields:

OrderID, Week, Order_Date, Customer_Name, Customer_Age, Country, City, Product, Units_Sold, Price_INR, Marketing_Spend_INR, Discount_Percentage, Payment_Method, Shipping_Status, Delivery_Time_Days, Revenue_INR, Discount_Amount_INR, Final_Amount_INR.

3. DATA CLEANING (STEP 1)

- Confirmed that the dataset contains **0 missing values**.
- Converted Order_Date into proper **datetime format**.
- Verified data types for all columns (numeric, text, date).
- Calculated new fields:
 1. Total Revenue = `SUM(gadget_sales_dataset[Final_Amount_INR])`
 2. Average_Units_Per_Week = `AVERAGE(gadget_sales_dataset[Units_Sold])`
Discount
 3. Total Sales = `SUM(gadget_sales_dataset[Final_Amount_INR])`

4. DATA ANALYSIS

4(a). Marketing Spend vs Units Sold

A scatter plot was used to examine the relationship between marketing spend and units sold. The chart showed a **positive correlation** — as marketing expenditure increases, units sold also increase.

This implies marketing activities directly help boost product sales.

Conclusion:

Higher marketing spend results in higher sales.

4(b). Highest Growth Product Across Weeks

Using the weekly Units Sold line chart, Earbuds, Gaming Console, and Wireless Mouse show upward trends.

Among them, **Earbuds** shows the most consistent and strongest growth trend.

Conclusion:

Earbuds is the highest growth product in weekly performance.

4(c). Key Overall Sales Insights**Product Revenues (from visuals):**

- Earbuds – ₹87,67,47,81 (Highest Revenue)
- Gaming Console – ₹83,99,43,25
- Wireless Mouse – ₹74,96,15,75
- Tablet – ₹74,77,13,05
- Smart TV – ₹72,47,41,55
- Bluetooth Speaker – ₹36,78,52,10 (Lowest Revenue)

Insights:

1. Earbuds is the top revenue-generating and fastest-growing product.
2. Bluetooth Speaker shows the lowest performance.
3. Sales come from countries like Japan, UK, USA, India, showing strong international presence.
4. Higher marketing spend increases units sold.
5. Portable gadgets (Earbuds, Mouse, Tablet) show the highest demand.
6. Discounts influence customer buying decisions.
7. Delivery times are stable, indicating efficient logistics.

5. VISUALIZATIONS USED**Page 1 – Sales Performance Analysis**

- Bar Chart: Total Revenue per Product
- Line Chart: Weekly Units Sold for Each Product
- Scatter Plot: Marketing Spend vs Units Sold
- Slicer : Products

- Donut Chart: Product Revenue % Contribution
- Map Visual: Sales by Country
- Bar Chart: Top 5 Customer Sales

6. FINAL CONCLUSION

The project demonstrates that:

- **Earbuds** is the most successful product in both revenue and growth.
- **Marketing activities** have a strong positive impact on sales.
- **International markets** significantly contribute to total revenue.
- The dashboard clearly explains sales trends and helps make informed business decisions.
